

「Creating a Global Niseko」

Opinion Exchange with Niseko Foreign Residents

In order to create a town of global standards, with a strong vision for the future, in which residents (regardless of origin) along with visitors can enjoy life and living. We are staging a opinion and idea exchange evening, where we will ask a panel of members from our foreign community, what would make a difference to Niseko as a area to live and to do business? What factors that they believe will drive the town into the future as a community with Global standards.

This opinion and idea exchange evening is a great chance for people from the local community to come and hear some ideas that are used in various countries around the world and add your opinions to these ideas, creating an even stronger base for the induction of the 5th Comprehensive Plan for Niseko Town.
